## Spanaway Lake Aquatic Plant Management Program

Aquatechnex biologists have been working with the Friends of Spanaway Lake to provide an option for aquatic weed control. Given the species present in the lake, the best approach would be the use of contact herbicides under permit from WA DOE.

The charge for this will be \$275.00 per 75-foot lot and treatment will go 100 feet off shore. Smaller or larger lots can be treated for \$3.67 per front foot.

Timing of the treatment will be in June, we have to provide time to receive and assemble a map of those requesting treatment, provide a 10 day advanced notice to lake residents within a quarter mile of all treatment sites and schedule the treatment event.

We will use the address you provided and the Pierce County Parcel Map GIS layer to mark properties for application in our onboard mapping systems on the treatment boats. If you don't get mail there will also need billing address.

To apply, we would need you to sign up with address of your lot and billing address if different. We would need interested parties to be signed up by May 31<sup>st</sup> so we can build treatment list. If your lot is not the standard 75 foot frontage we need you to provide that number also for billing.

We will bill for treatment on completion and expect payment to be processed and returned to us within 7 days.

Those interested should email [tmcnabb@aquatechnex.com](mailto:tmcnabb@aquatechnex.com) and put Spanaway Lake Sign up in the email subject line.

Thank you for your consideration. For more information on our firm, [www.aquatechnex.com](http://www.aquatechnex.com)
